Boma capturing technique

Africa's Boma technique is adopted at Keoladeo National Park in Rajasthan's Bharatpur district for capturing and translocating spotted deer.

[Ref: ResearchGate]

About Boma Capturing Technique:

- It is a technique popular in **Africa**.
- It is most popularly used for **wildlife introduction** to settle and habituate an animal to its new home.
- It involves the **luring of animals into an enclosure** by chasing them through a funnel-like fencing.
- The animals are moved through the funnel toward the crush and each curtain is closed once the animals have passed it.
- Animals are moved through the crush onto a ramp and into a transport truck.
